

ObituaryWriter.app – Press Overview

About the Product

ObituaryWriter.app is a compassionate web tool designed to help individuals create thoughtful, professionally formatted obituaries with ease—especially during moments of emotional difficulty. Rather than facing a blank page, users are guided through a series of simple prompts where they enter basic information, stories, tone preferences, and service details. Behind the scenes, AI helps craft a clear, respectful obituary draft that feels human—not robotic. Once complete, users can preview the obituary as a watermarked image, download a free PDF in a clean layout, or choose from a selection of premium templates. No login is required, no data is saved, and privacy is respected at every step. Whether someone is writing for a loved one, helping a friend, or planning ahead, ObituaryWriter.app provides both clarity and dignity during a deeply personal task.

Key Features

AI-generated obituaries based on selected tone: traditional, lighthearted, poetic, or religious Upload an optional photo and personal quote Free and premium printable PDF layouts Preview with watermark before download No login required; privacy-first and data-free design Built for individuals, families, funeral homes, and pre-planners

Why It Matters

Most people will only write one or two obituaries in their lifetime—and they often do it under stress, grief, or time pressure. ObituaryWriter.app offers a helping hand when words are difficult. It doesn't replace emotion, it shapes it. Technology should not feel cold when used for something so human. This project proves it doesn't have to.

About the Founder

Paul Pacitti is a visual artist and developer based in Luzern, Switzerland. With a professional background in photography and digital design, he built ObituaryWriter.app as a quiet, respectful tool to support others through loss. Paul trained at Stradbroke College (UK) and has worked in both commercial and print media. This project is his way of using modern tools to honor timeless human needs.
